CIMC-Tianda Holdings is the world's leading supplier for airport equipment providing advanced and reliable products and services to customers worldwide. Over the past 20 years, we have been implementing innovative technologies and manufacturing the best quality products such as: passenger boarding bridges, ground support equipment, fire engines/rescue equipment and automatic logistic equipment. We stand out among our fierce international competitors, making us a multi-national company and becoming an outstanding representative in China's high-end manufacturing and airport equipment industries.

## 1989

CIMC Airport Facilities Department established.

## 1990

Awarded the first Passenger Boarding Bridge project at Tianjin Airport, China.

## 1991

Obtained the first Air Cargo Handling System project at Southern Airlines Cargo Terminal in Guangzhou Baiyun Airport, China.

## 1992

Attained the first international Passenger Boarding Bridge contract at Hong Kong Kai Tak Airport.

CIMC Airport Facilities Co., Ltd was then officially established.

## 1993

Base in Shekou (Shenzhen, China), officially open for operation.

## 1997

Awarded the Passenger Boarding Bridge project for Beijing Capital International Airport terminal 2. It was the first time for a single project contract amount to exceed 100 million yuan.

The Company changed its name to CIMIC Tianda Airport Support Ltd. The Vice Premier, Zou Jiahua commemorated the occasion by providing the written inscription "Aim for international and fight for the glory of the country."

## 2000

The Company lost an intellectual property lawsuit against FMC in the United States and was on the verge of bankruptcy.

The Company reorganized the board of directors and management appointing Zheng Zuhua as the General Manager.

## 2002

Acquired a major Cargo Handling System project, as the prime contractor from China Southern Airlines at the new airport in Guangzhou; which happened to be the second largest airport in the world at that time. This major project rewrites the record for the largest awarded single contract amount of its time.

The first roadway stacker parking garage project at Beijing Tuan Jie Hu apartment that was delivered and used. This garage became the demonstration project by the Beijing Municipal Science and Technology Commission to showcase the advanced technology level adopted by the venture.

## 2003

Gained worldwide exposure in competing with top global boarding bridge manufacturers for the West Point Corridor Boarding Bridge project at new Guangzhou Baiyun International Airport.

## 2005

Obtained Passenger Boarding Bridge contract from Group ADP.

CIMC Airport products were able to enter the markets of Europe and other developed countries comprehensively.

Acquired the core independent intellectual property rights, the world's first main auxiliary wheel support, and four independent drive walking including the dock of the upper U1 cabin door of A380 aircraft that was successfully developed.

## 2006

Awarded 132 Passenger Boarding Bridges projects at Beijing Capital International Airport terminal 3.

Achieved the goal of the largest number of orders in the industry for the year; which also included the first domestic passenger boarding ferry that was successfully developed and installed for Yan Da Gang project.

## 2007

Launched the global intellectual property layout; 213 patents accumulatively applied and 125 authorized including the United States, the European Union, Japan, Australia, Hong Kong and other countries and regions.

## 2008

CIMC Airport provided A380 Passenger Boarding Bridge to Beijing Capital International Airport for the first time and successfully completed the Olympic guarantee mission.

## 2010

Queen Elizabeth II's step on the Passenger Boarding Bridge provided by CIMC Airport to Winnipeg Airport in Canada.

Signed a 10-year exclusive purchase agreement on the boarding bridges and bridge equipment with French Airport Management Company and the Dutch SKI Group.

## 2012

Acquisition of Xinfra Airport Equipment Ltd., a subsidiary of Beijing Capital International Airport Group Co. Complete development for the two-way driving shuttle bus, furthered enriched the airport port business products.

## 2013

The acquisition of Ziegler, a German company, and Airmarrel, a French company, with enriched products types in fire rescue vehicles and airport lift trucks under the CIMC Airport Group.

Shenzhen CIMC Intralogistics Systems Co., Ltd is registered officially.

## 2014

Complete the reverse takeover project with Pteris Global Limited in Singapore, which lead to the establishment of the CIMC Airport Facilities as headquarter.

## 2015

Headquarter of CIMC Airport Facilities was relocated to Fuyong, a new location in Bao'an District in Shenzhen. South China (Fuyong) facility, North China (Langfang) facility, and East China (Kunshan) facility were successfully put into production.

Became the largest shareholder of China Fire Safety Enterprise Group Limited, further strengthening the market competitiveness in the field of fire rescue.

## 2016

Acquisition of aircraft ground air-conditioner business of Jirong Air Conditioning Equipment Company and entered the field of bridge equipment.

CIMC-TianDa Holdings Company Limited was then incorporated.

## 2017

Shenzhen CIMC-Tianda Jirong Aviation Air-Conditioning Co., Ltd. was established.

Shenzhen CIMC Smart Parking Co., Ltd. was established.

Acquired a well-known enterprise in the logistics sorting industry and changed its name to Zhengzhou CIMC Jinte Automation System Co., Ltd., further strengthening the technical strength of system integration.

## 2018

CIMC-Tianda Holdings Company was listed on stock market in Hong Kong. The stock code is 0445.HK

## AUTOMATIC LOGISTICS SYSTEM

CIMC-Tianda Holdings provides sensible and detailed system development, design plans and professional equipment for domestic and international carriers and airports globally. Its air cargo handling system has the highest market share in the world and its domestic market share has exceeded 65%. In recent years, business has expanded to the areas of classified documents management, exploration of the core, equipment manufacturing, iron and steel, chemical industry, electric power, automotive, pharmaceuticals, and food industries, etc. Manufacturing base is in the East China, Kunshan, Jiangsu Province and is positioned as the world's advanced logistics automation equipment in terms of R&D and manufacturing. Another manufacturing factory is

in South China, Fuyong, Shenzhen, which serves as the modern airport logistics equipment industry base. These two factories echo each other forming an effective industrial layout in the Southeast area.

Our airport logistics provider Pteris Global Limited is dedicated to providing comprehensive logistics automation solutions in Baggage Handling Systems (BHS). This market share expands over 50 countries throughout the world, developing into one of the world's largest integration providers of baggage handling system. Business outside aviation logistics has grown by leaps and bounds.

CIMC-JINTE owns a variety of high-end sorters, providing safety precaution to boost CIMC airport automation business to a higher level.
